

CERTIFICATION QUALITY POLICY

Halal Australia ensures consistency, accuracy, and a high customer service level without a compromise on due diligence and quality parameters. Due to constant developments in the food industry, complex supply chain, dynamic global halal regulations, and evolving consumers' expectations, Halal Australia is committed to achieving enhanced competence of its personnel involved in halal auditing, evaluation, communication, and effective decision making.

Halal Australia's management aims to provide the required resources and skills to satisfy its stakeholders' expectations, including but not limited to entities that recognise the certification and activities of the Halal Australia, accreditation bodies, and regulatory authorities. The Quality Policy is reviewed for its continual suitability through the "Quality Management System Planning and Review" process.
